#### 1. Qualitative Information on Quarterly Financial Results

### (1) Explanation of Operating Results

During the six months ended September 30, 2023 (April 1, 2023 to September 30, 2023), the global economy faced a prospect of stagnation in economic activity due to such factors as disruptions in energy and food markets caused by Russia's invasion of Ukraine and prolonged global monetary tightening to deal with rapid inflation.

The Japanese economy has not been able to dispel concerns about a downward outlook, as energy and raw material prices remained high and consumers increasingly tended to save money due to rising prices of daily necessities.

Under these circumstances, the Group has continued to solve social issues in Japan and overseas by supporting the evolution of infrastructure with safe and comfortable solutions and promote adaptation to changes in the post-COVID-19 business environment, based on the medium-term management plan "Next Stage 24" that began in FY2022.

The Company's business results for the six months ended September 30, 2023 were 56,726 million yen in orders received (down 10.4% year-on-year) and 34,194 million yen in net sales (down 2.5% year-on-year). Operating profit was 357 million yen (down 64.0% year-on-year), ordinary profit was 1,105 million yen (down 34.0% year-on-year) and profit attributable to owners of parent was 519 million yen (down 28.6% year-on-year).

An overview of the Company's business by segment is as follows.

## [Transportation Infrastructure]

In Railway Signal Systems, we received orders for and recorded sales of Automatic Train Control (ATC) systems, interlocking devices, and other products from railroad operators in the Japanese market. We also engaged in business activities aimed at the realization of CBTC (Communication-Based Train Control system), which contributes mainly to streamlining of facilities and efficient train operations. In the overseas market, such as in Taiwan and the Philippines, we received orders for and recorded sales of Railway Signal Systems. In Taiwan, in particular, we have received an order for a project to double track the single-track section of the Huadoing Line in order to enhance transport capacity in eastern Taiwan.

For Smart Mobility Systems, particularly Road Traffic Safety Systems, we received orders for and recorded sales of traffic control systems, traffic signal lights, and other products. We also actively participated in various automated driving demonstration projects, providing products and technologies that contribute to the "Vehicle-Infrastructure Cooperative System" linking automated vehicles with traffic signals and roadside sensors.

As a result of the above, orders received were 27,680 million yen (down 34.5% year-on-year) and net sales were 17,094 million yen (down 10.8% year-on-year). Segment profit was 461 million yen (down 67.9% year-on-year).

#### [ICT Solutions]

In AFC, particularly Station Service Network Systems, we received orders for and recorded sales of platform screen doors, ticket vending machines, and other products in the Japanese market. In addition, we have been developing products and services that support the digitization of tickets and electronic payments as solutions for seamless travel. In the overseas markets, especially in India and Bangladesh, we received orders for and recorded sales of AFC systems, platform screen doors, and other products.

In R&S, which focuses on robotics and sensing, we received orders for and sales of security products and security robots, especially 3D laser ranging image sensors to be installed in platform screen doors, construction and agricultural equipment. Based on the basic concept of fail-safe, we are also promoting efforts to realize a future society in which humans and robots work together by integrating the latest robotics technologies with our core technologies, such as sensors and image analysis, which we have cultivated through our past experience.

As a result of the above, orders received were 29,046 million yen (up 38.1% year-on-year) and net sales were 17,099 million yen (up 7.6% year-on-year). Segment profit was 1,615 million yen (up 26.7% year-on-year).

## (2) Explanation of Financial Position

#### (i) Assets, Liabilities and Net Assets

Total assets as of September 30, 2023 were 143,295 million yen, a decrease of 2,723 million yen from the end of the previous fiscal year, mainly due to a 16,094 million yen decrease in notes and accounts receivable - trade, and contract assets, despite a 9,408 million yen increase in inventories, a 2,014 million yen increase in cash and deposits, and a 1,577 million yen increase in investment securities due in part to a rise in fair value.

Liabilities decreased by 3,476 million yen from the end of the previous fiscal year to 53,191 million yen, mainly due to a 3,815 million yen decrease in short-term borrowings and a 692 million yen decrease in income taxes payable, despite a 1,164 million yen increase in electronically recorded obligations - operating.

Net assets were 90,103 million yen, an increase of 752 million yen from the end of the previous fiscal year, mainly due to the recording of 1,525 million yen in valuation difference on available-for-sale securities and the recording of 519 million yen in profit attributable to owners of parent, despite a 1,247 million yen decrease in retained earnings from dividends, etc.

#### (ii) Cash Flows

The balance of cash and cash equivalents ("cash") as of September 30, 2023 totaled 10,379 million yen, an increase of 2,014 million yen from the end of the previous fiscal year.

Cash flows in each area of activity during the six months ended September 30, 2023 are as follows.

#### (Cash flows from operating activities)

Net cash provided by operating activities was 7,582 million yen, compared with a cash inflow of 3,001 million yen in the same period of the previous fiscal year. The principal cash inflow factor was a decrease in trade receivables, while the principal cash outflow factor was an increase in inventories.

#### (Cash flows from investing activities)

Net cash used in investing activities was 579 million yen, compared with a cash outflow of 1,097 million yen in the same period of the previous fiscal year. The principal cash outflow factor was the acquisition of property, plant and equipment and intangible assets, while the principal cash inflow factor was the sale of investment securities.

### (Cash flow from financing activities)

Net cash used in financing activities was 5,011 million yen, compared with a cash outflow of 548 million yen in the same period of the previous fiscal year. The principal cash outflow factors were repayment of short-term borrowings and dividend payments.

## (3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information

There are no revisions to the full-year consolidated earnings forecast for the fiscal year ending March 31, 2024 (April 1, 2023 to March 31, 2024) announced on May 10, 2023.

Among the Group's main businesses, Railway Signal Systems and Smart Mobility Systems in the Transportation Infrastructure segment and AFC in the ICT Solutions segment tend to have a higher proportion of the Group's sales at the end of each fiscal year, as capital investment by domestic railroad operators, which are our major customers, and public investment by police and other entities are the main drivers.

### (4) Notes to Quarterly Consolidated Financial Statements

(Notes on going concern assumption)

Not applicable

(Notes in case of significant changes in shareholders' equity) Not applicable

(Accounting methods adopted particularly for the preparation of quarterly consolidated financial statements)

(Deferral of cost variances)

Cost variances arising from seasonally fluctuating operating rates are expected to be mostly eliminated by the end of the cost accounting period (end of the fiscal year or the second quarter of the fiscal year); therefore, such cost variances are deferred as current assets (other) or current liabilities (other) at the end of the first and third quarters of the fiscal year.

#### (Calculation of tax expenses)

Tax expenses are calculated by reasonably estimating the effective tax rate after applying tax effect accounting to profit before income taxes for the consolidated fiscal year, including the second quarter of the fiscal year under review, and multiplying income/loss before income taxes for the quarter by the estimated effective tax rate.
